EDUCATION

2022 -2026

Bachelors in Computer Science

Quaid-e-Azam University
,Islamabad

SKILLS

- Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- Backend:** Node.js, Express.js, REST APIs
- Database:** MongoDB, MySQL.
- Design:** Figma, Responsive Design.
- Other Tools:** Git/GitHub, Vercel, MS Word, Excel, PowerPoint, Access, VS Code
- Additional:** C++, Python (basics), Postman.

CERTIFICATES

Blockchain, Artificial Intelligence & Machine Learning — Navtacc Institute, 6-month program (2025)

LANGUAGES

- English
- Urdu(native)

ABOUT

Computer Science graduate from Quaid-e-Azam University with hands-on experience in machine learning, NLP, and blockchain development, plus practical full-stack development experience gained through a professional internship. Completed a 6-month AI/ML program at Navtacc Institute and built full-stack web applications, including a real-world investor-entrepreneur collaboration platform with video calling, document management, and payment integration. Passionate about applying AI and modern web technologies to solve real-world problems.

EXPERIENCE

Full Stack Developer Intern — Developers Hub Corporation [2026]

- Developed and maintained features for full-stack web applications using React.js, Node.js, and MongoDB as part of an agile development team.

PROJECTS

eCommerce Full Stack Web Application

- Built a fully responsive eCommerce application for desktop and mobile views based on Figma design
- Deployed live application on Vercel with complete GitHub version control
- [GitHub: github.com/nawalnajam/e-commerce-fullstack-design](https://github.com/nawalnajam/e-commerce-fullstack-design)

Nexus – Investor & Entrepreneur Collaboration Platform

- Built a full-stack platform connecting investors and entrepreneurs with role-based dashboards
- [GitHub: github.com/nawalnajam/Nexus](https://github.com/nawalnajam/Nexus)

ML(Machine Learning) Project:

- Data preprocessing, training ML models(classification/regression, and analyzing predictions,feature engineering .
- Evaluated model performance and analyzed predictions using standard metrics
- Tools:** Python, scikit-learn, Pandas, NumPy

NLP Project:

- Text analysis, sentiment classification, and natural language processing tasks.

Blockchain Project:

- Building simple smart contracts and understanding decentralized applications (DApps).
